CABIN SHELL OPTION

Want to finish out your own cabin? We can build the rough in shell to your specs...window and door placement, interior walls, etc. If desired we can have the electrical and/or plumbing done by our state certified contractors. We can also have the ceiling and gable ends spray foamed for your convenience if desired. Let us know how far you want us to take your cabin, and we will turn the rest over to you or your contractor!

Reviews

Jon, I just would like to say I am extremely pleased! The whole process from ordering to delivery as exceptional. The building itself is well built and exactly what I wanted!

Thank you!

Bobbi - Melrose, Montana

What an amazing company to work with! Our cabin came out perfectly and the quality and craftsmanship of the build was incredibly impressive. Jon was fantastic to work with and very helpful in helping us design our shed. The delivery was smooth and an excellent experience, we can't say enough good things about Montana Structures! If you are looking for a shed or cabin, we highly recommend that you check out this place, they are so professional and a wonderful company!

Aaron & Tamara Wade - Trout Creek, Montana

The service I got from Montana Structures was great! They are very good at unloading your structure just how and where you want it. I was very surprised when they unloaded my cabin, how they can move it around so easily. They build quality structures. Everyone was helpful and super nice.

Nick Giard - Bozeman, MT

Use Your Building

Once your order is confirmed and your cabin is constructed, the day you longed for will arrive: delivery day! Upon delivery, we will position the cabin in the designated location on your laser leveled, compacted gravel pad. Once it is securely in place, the plumbing and electrical connections need to be done and you can begin utilizing your cabin immediately.

Delivery Made Easy!
